

Automatic Telephone and Electric Company Limited

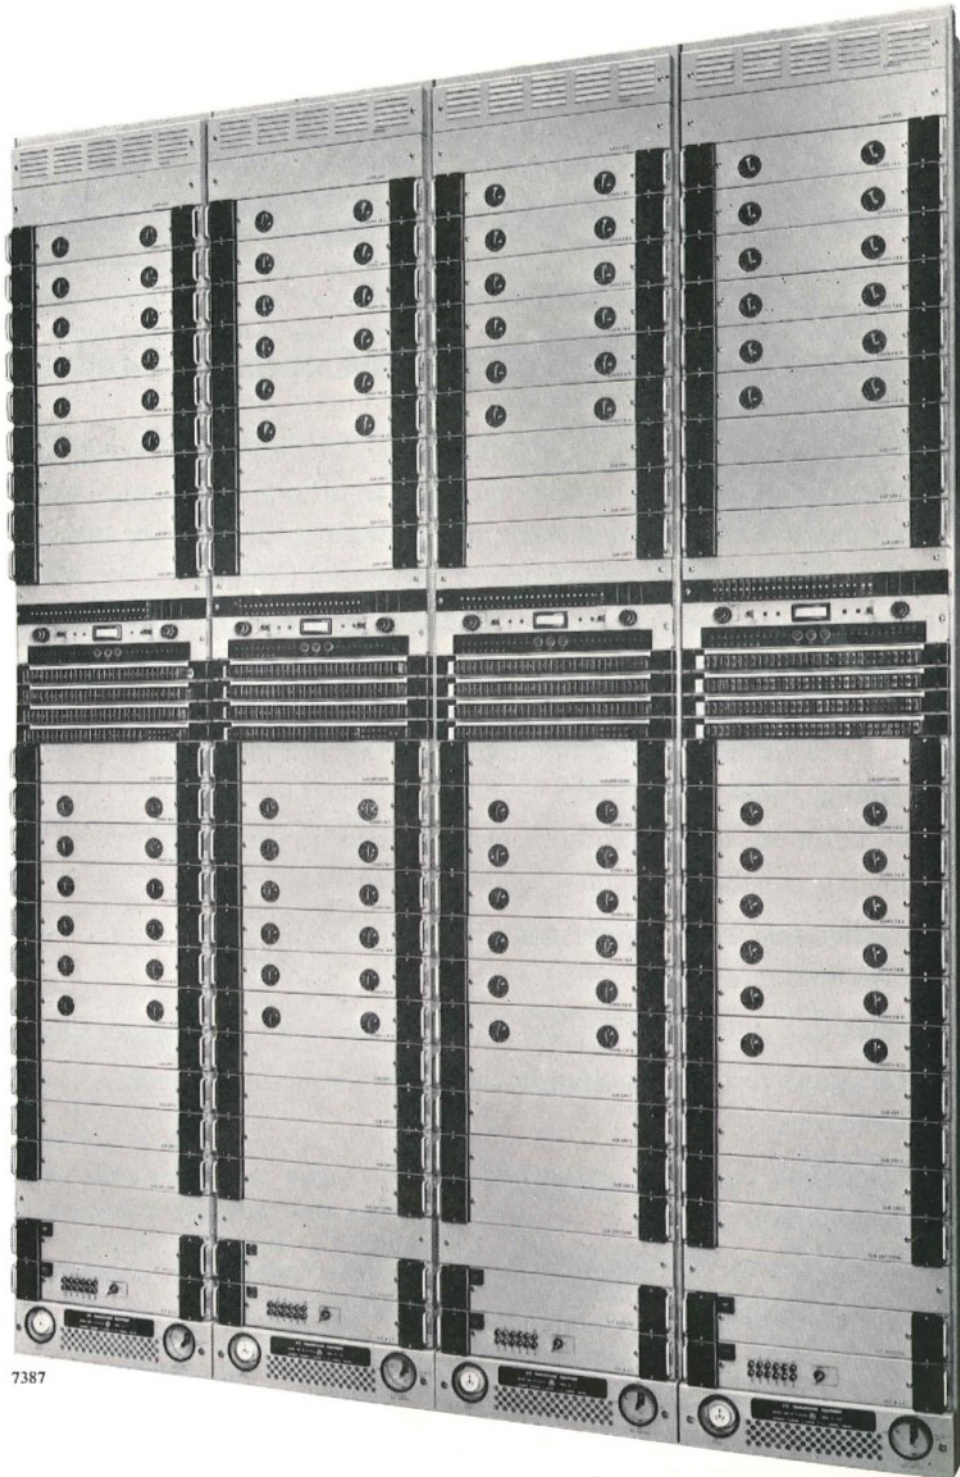

in association with

Marconi's Wireless Telegraph Company Limited

THE USE OF RADIO for all multi-channel telephone and telegraph circuits makes available an alternative to traditional cable and open-wire lines as a transmission medium. In order to provide the utmost flexibility in varying circumstances the Marconi Company now offers in association with Automatic Telephone and Electric Company a service to Telephone Administrations which is unsurpassed. Such co-operation brings together an unrivalled wealth of knowledge and experience for the benefit of all whose work lies in the field of telecommunications.

In addition to the equipment described in this catalogue the following are also available:

- 1 Carrier telephone equipment for use on radio, cable and open-wire lines.
- 2 Telegraph equipment for use on radio, cable and open-wire lines.
- 3 Telegraph terminal equipment including regenerative repeaters and ancillaries.
- 4 Telephone exchange apparatus for all types of automatic and manual requirements.
- 5 Apparatus for telemetering in conjunction with radio, cable and open-wire lines.
